Eagle-FoilCURE™

Is a revolutionary new Cold Foil process invented by Eagle Systems.

- 1) It is Process
- 2) It is Materials
- 3) It is Mechanical
- 4) It is Software
- 5) It is Eagle KNOW how!

Together with the the right formula of each, we have the highest shine ever achieved in sheet fed Litho Cold Foil. The typical Cold Foil process gave us a 410 Gloss Level and now running same through Eagle-FoilCURE™ gave us a 630 Gloss Level. This is an increase of Gloss Level by 52%. You can actually see yourself in the foil.

Visit us at Print 2017 booth 3002 from Sept 10 thru 14th!!!!!!
To see Eagle-FoilCURE™ samples.
